BEECHER

DOCTORS ADVERTISING. seemed superior and wonderful merits.

• • • I am glad that the doctor cured him; I am glad that the doctor put in the paper that he could cure him. And if any doctor is certain that he can cure mch diseases and don't put it in the paper, I am sorry What a pity it would have been had this doctor come to town with his wealth of science and experience and gone away leaving him uncured! What a pity it would have been if he had been so prejudiced against advertising as to read the responsible certificates of the doctor and give him the go-by as a quack! What are newspapers for if not to circulate information? What has devoted his life and labor to the study of a special class of discases, the necessity for his saving so be-comes all the more pressing. His duty to advertise

When I was in England I found on all the dead walls

of London placards declaring that Dean Stanley, Chap-lain to the Prince of Wales, would preach at such a place; that his grace the Archbishop (I think) of Can-terbury would preach at another time and place; that an Oxford professor would preach. In short, religious notices were sprinkled in among the theatre bills; the highest church dignitaries were advertised side by side with actors, singers, clowns, and patent medicine men. Of course I was shocked by it, but in a moment I bethought me—if it be all right and dignified to hire a sexton to ring a bell when the minister is soing to preach, it is all the same to stience the bell and hire a bill-sticker to tell the same news. The essential thing is to tell the truth every time. The remedy for the lying advertisements is for honest men to tell the truth en iniquity cometh in like a flood, then the spirit of the Lord lifts up a standard. A really able man, whatever be his gifts, makes a great mistage if he fails to use those gifts through want of advertising. - Gasette. The remedy for lying advertisements is for honest men to tell the truth." If a physician has made valua-ble medical discoveries that enable him to remely discases heretofore regarded as incurable, what virtue or modesty is there "to hide his light under a bushel? erefore, the exposition of my theories respecting conic diseases, and the testimonials of my success in treating them, I am willing to submit to the discriselves the affairs of life, and all have a deep concern in the subject of health, and are interested to know the reason why such remarkable success has attended my practice. The published testimonials of these extraordinary cures of notable persons, some eminent in let ters, do not embrace one in a thousand of those that it doubts of the authenticity of a single testimonial which I publish, let that person enclose stamps to pay postage on a reply and address the party subscribing to such testi-

I will here say that if any person will find one testimo-nial among those I publish which is not genuine. I will Pay that Person \$1,000.

A FALLACY EXPLODED.

Success in Business.

My experience has satisfied me of the truth of the maxim: "Success makes success;" for it is because some sufferer has obtained relief and cure that that sufferer has sent another to me; and it is because thou-sands have been cured that they have recommended me and my superior remedies to other thousands of sufand my superior remedies to other thousands of suf-ferers. In this way I am constantly making Heing ad-vertisements for myself and medicines. It is a common thing to hear people say that plenty of advertising will make a success out of anything whether it has any merit or not. Nothing could be further from the truth. It is with this delusive likes actuating them that thou-sands have rushed headlong into advertising, only to find themselves bankrupt in a little while. Not more than one in five hundred who engage in advertising and themselves bankrupt in a little while. Not more than one in five hundred who engage in advertising medicines ever make a financial success out of the undertaxing, for the reason that a medicine to be successful must possess unusual and extraordinary merit. It is not enough that it should be a remedy of fair efficacy; it must possess superior and wonderful remedial property and wonderful remedial property and wonderful remedial property.

will prove ruinous to the proprietor. For, although : great display of advertising will, many times, create a considerable immediate demand for the article adver. tised, yet if that article does not possess real ment, the fors. It is because so many ignorant charistans resort to this method to impose upon the credulity of the ignorant and paim off upon them their empirical services and worse than worthless medicines. But the practise of this kind of frau and knavery should not raise a presumption against the popular announcement of real skill and genuine discoveries, for the base. With this view of the subject, I have felt warranted in

in many of the most largely circulated periodicals pub-lished in America, paying sometimes for a single page,

Several Thousand Dollars.

feeling perfectly assured that the merits of my remedies alone would make a financ al success of such a signatic undertaking. And in this I have not been dis-appointed, for my sales have increased steadily until, appointed, for my sales have increased steadily unit, at the rate my medicines have been selling for the past few months, the sales will exceed

Haif a Million Dollars

per annum. This grand success, I am certain, could never have been attained had the medicines not pos

The following extract is from an editorial article which appeared in the Buffalo News May 3, 1874 :

A Mammoth Establishment and an Enterprising Proprietor. It is hardly necessary for us to call attention to the

It is hardly necessary for us to call attention to the whole page communication from Dr. R. V. Pierce, of the World's Dispensary, which appears in this issue, as at least every invalid suffering from enronic disease must see and take a lively interest in the sound, common sense likeas therein set forth, as well as in the indisputable evidences of wonderfail cures that are given. Butlaso has several business eatablishments of which his may justly feel proud, out few, if any indeed, that has acquired such world-wide fame and reputation as that of 1r. Pierce—The World's Dispensary. This state of 1r. Pierce—The world's Dispensary. This could not be such as a complete of its kind that can be found anywhere, and medicines are prepared within its waits that find ready sale in every quarter of the globe. In fact the foreign trade forms no small part of the business. A visit to the shipping department, which is on the first floor, gives one a slight idea of the colossal proportions of the business there transacted. Here the visitor may see, as we did, huge piles of bores being shipped to wholesale houses in every part of the isnd. also to foreign countries—even China and Japan contributing to the demand for these popular medicines. The Doctor has achieved this immense patronage and demand for his celebrated remedies by his great skill as a physician, the superior curative virtues of the remedies had shooted the superior curative virtues of the remedies had solvered, and his honorable dealings, indomitable with, and ceaseless industry. The currs that he has effected have often been wonderful, in fact almost the superior curative virtues of the remedies had solvered, and his honorable dealings, indomitable with, and ceaseless industry. The currs that he has solved by his many summents had a head of the colosus of the business than most pulpicans, in ordinary practice, treat in a whole lifetime. His practice has become only treated and the effect to give him an immense experience, his nontain character of his professional

Not Patent Medicines. It is unfair to class my Family Medicines with the patent nostrums of the day, compounded by "quacks," Indian doctors "(so styled), or by those who may be very good druggists, but possess no knowledge of the delicate and intricate structure of the human system or the action of remedies upon it. No patent has been obtained or asked for upon any of my medicines. The are simply the favorite prescriptions of a physician in regular practice, who has for years made the study and treatment of Chronic Diseases a specialty, and who has had a very large experience in their treatment in be

hospital and private practice.

No pains or expense are spared to make every bottle
of these medicines as pure and uniform in strength and as perfect in every respect as is possible, thus keeping up their high standard of excellence which has for years rendered them so popular, only the choicest barks, roots, and herbs being used in their manufa-

must possess translated and extraordinary merit. It is not enough that it should be a remedy of fair efficacy; it must possess superior and wonderful remedial properties; for if it does not, those who use it with the most sanguine expectations will evodemn it. They will expect much of it, and it must be aqual to the test, or it me in my practice and contributing in no small degree

to my success in mastering the complicated, obscure, and difficult cases of disease that it has fallen to my lot

LIVER COMPLAINT.

Its Symptoms and Rational Treatment; Diseases of the Blood and Skin, Jaundice, Constipation, Piles, Headache, Colic, Diarrhea, Nervousness, Diseases of Kidneys and Bladder, Dizziness, Heart Disease, Dyspepsia, and Many Other Forms of Disease Caused by Liver Complaint.

The Liver is the largest organ or gland in the human system. It is the great blood puritying or depurating machine of our system, the "housekeeper" of our health. Diseases of the liver are much more common health. Diseases of the liver are much more common than people suppose. I have observed in the dissecting room, and in making post-mortem examinations upon the bodies of those who have died of various diseases, that in a large proportion of cases the liver has shown evidence of having at some time been diseased.

This is true both of man and peast, as every butcher knows that he finds the livers of cattle, sheep, and swine diseased ten times where he finds any other organ swine diseased ten times where he nads any other organ diseased once. Almost every one is billous at some time, and many are constantly billous. It may be mere congestion of the Liver, and torpicity of its function, or this may result in some structural or organic affection. The human system, the most perfect of all the works of the Cre-tor, is so constituted that to be entirely healthy it must throw off the waste, worn out, and poisonous projections and all the second ones materials from our materials as fast as it takes on new materials from our food and drink. The food is made into nourishing and healthy blood, principally through the offices of the stomach and Liver. The worn-out materials are mostly carried out of the system through the Liver, Lungs, and Kidneys. The vast importance of the Liver as a blood-principal and expertisy organ is amply proven by sevpurifying and excretory organ is amply proven by sev

eral most learned German physiologists, who base their assertions upon actual experiments. The four and morbid matter absorbed from the varions tissues, and taken into the blood, is absorbed there-from by a healthy liver and converted into bile, which is conveyed into the duodenam or upper portion of the small intestines, where it unites with chyme (partially digested food), completes digestion and separates the mass into refuse matter, to be conveyed away by the intestines, and chyde, a milky substance which is taken ntestines, and chyle, a milky substance which is taken up from the intestines by the lacteds, and carried into the blood, in which it circulates, and is carried to every part of the system, furnishing those elements necessary to sustain a healthy growth of the different organs and parts. A healthy liver secretes each day about two and a half pounds of bile, which, as I have observed, contains a great amount of waste material taken from the blood. When the liver becomes torpid or congested, it fails to eliminate this vast amount of noxious substance, which, therefore, remains to poison the blood and to be conveyed to every part of the system. What must be the condition of the blood when it is receiving and retain-ing each day two and a half pounds of poison? Nature tries to work off this poison through other channels and organs—the Kidneys, Lungs, Skin, &c.; but these organs become overtaxed in performing this labor in ad dition to their natural functions, and cannot long with stand the pr ssure.

The blood, surcharged with the daily accumulated

excess of bile, unquiy stimulates the nerves of the Heart, and if this cause is long continued it produces chronic irritation, undue excitement and morbid nutrition of that organ, developing many forms of Heart

poisoned blood passes from the upper and right c-vity of the heart to the lower cavity, thence directly to the lungs, circulating through all parts of these most dehcate organs. The tissues of the lungs are poisoned and irritated, and invite the scrofulous humors with which the blood is burdened by being thus irritated. In this way Consumption, which is Scrofu.a of the Lungs, so defined and proven by all the most scientific authors, is established.

The blood is in a measure oxygenized and purified by

the Lungs, but in this effort these organs are over-worked and irritated, and the foul blood poison may be smelled in the man's offensive breath. Nervous Cough, Bronchitis, Asthma, and Consumption itself, are the natural results. The Lungs would not have become diseased had the Liver done its duty excreting the bile. The impure blood not only affects the Heart and Lungs but also other important organs. It passes from the Lungs back to the upper left cavity of the Heart, thence to the lower cavity, and thence through the arteries and capillaries to every tissue and organ. They become diseased, being irritated and congested by the

The Brain, which is the great electrical centre of all vitality, is unduly stimulated by the unhealthy blood which passes to it from the Heart, and it fails to performits office healthfully. Hince, the duliness, head-ache, incapacity to keep the mind on any subject, im-pairment of memory, dizzy, sleepy, or nervous feelings, gloomy forebodings, and irritability of temper. The blood itself being diseased, as it forms the sweat upon the surface of the skin, it is so irritating and poisonous that it produces discolored brown spots, pimples, blotches, and other eruptions, sores, carbuncles, and scrofulous tumors. The stomach, bowels, and other organs spoken of cannot escape becoming affected sooner or later, and Costiveness, Piles, Dropsy, Diar-

Symptoms of Liver Complaint and of Some of the Diseases Produced by

A sallow or yellow color of the skin, or yellowish brown spots on the face and other pa is; duiness and drowniness, with frequent headache, dizzioess, bitter or bad taste in the mouth, dryness of the throat, and internal heat; papitation of the hart, in many cases a dry, teasing cough, with sore throat; unknessedy appetite, sour stomach, with a raising of the food and a cooking sensation in the throat; sickness and womiting, distress, neaviness, or a bloated and full feeling about the stomach and sides, which is often at ended with pain and tenierness; aggravating pains in the sides, back, or breast, and about the shoulders; colic, nain, and soreness through the bowels, with neat; constipation of the bowels, attending with frequent attacks of char dear piles, fathlence, nervousness, cold-raise, with symptoms of apolicky, numberes of the limbs, especially at night; cold chills, alternating with he fashes, with duilness, low spirits, unnochability, and cloomy foreboolings. Only a few of the above symptoms will be likely to be present in any case at one time.

Rational and Successful Treatment of Liver Complaint.

I have shown how a large variety of diseased conditions are produced by liver compaint. By curing the disease of the liver we remove the cause, and thereby radiculty cure not only the liver complaint, but also the various other diseased countions produced by it.

It is generally the custom to take strong liver stimulants for the liver complaint, and both the innersal and vegetable kingdoms have been dil gently searched to produce the most drastic and poisonous purgatives, in order to produce a powerfo, effect upon the liver, and rouse the lagging and enfectived organ. These medicines are given freely and in large doses, which keep the liver in an excited condition while under their influence. This system of treatment is on the same principle as that of giving a weak and debitted man large portions of orandy to enable him to do a certain amount of work. Every intelligent person can readily see, or imagine, the condition the man would be in when the work was done and the brainly withheid and it is just so with the liver. When the stimulant is worthed to the liver of the stimulant while they arouse the liver to action, will do it not by a dose of great, repusive, effecting, drastic pill, edomic liver of great repusive, effecting, drastic pill, edomic liver of great repusive, effecting, drastic pill, and other liver, as a that organ. Medicines are wanted that, while they cause the blive of five irrely from the liver, as that organ is toned into action, will not overwork and the scholintariat, but will, when their use is discontinued, leave the liver strengthened and healthy. Such medicines I am happy to have been able to discover and introduce to the utilized for their reflect and core. As a r medy for all the various mininfestations of disease resulting from 'Liver Companit,' as it is usually termed, and as a blood purfier, Liver Complaint.

Dr. Pierce's Golden Medical Discovery

is positively unequalled. By it the liver and stomach are changed to an active, healthy state, the appetite regulated and restored, the blood and secretions thoroughly purified and ceriched, and the whole system renovated and belief up snew.

Its action is mild, yet p suite and lasting. It does not simply pullifate the disease and relieve it for the time being, but it produces raided and lasting benefit.

There are, nowever, some peculiar constitutions on which the Discovery will not prove sufficiently laxative to unelog the howels, and instead of taking it in larger doses than two teaspoolfuls four times a day, if that quantity does not move the bowels twice in twenty-four hours, take from one to three of

Dr. Pierce's Pleasant Purgative Pellets

each day, or just sufficient to produce the desired relaxion, which should fall short of a cath rithe effect. In fact, the combined use of the Para cath rithe effect. In fact, the combined use of the Para cath rither the first, in the inid doses which I recommend, will be found most effective in arousing the secretion of the liver, and subduing congestion or inflammation of that orzen. Do not use any other instailve or catarite with the Discovery, as none other is so well calculated to work in harmony with and assist the Discovery in its congenial operation. Other catharties will frequently construct and interfere with, or neutralize the power and good effect of the Discovery; they should not, therefore, be used. These little Purgative Pellets or Sugar-Conted Root and Herbal Junce Antibilious Graulies, on the other hand, are so compounded as to harmonize with and assist the Discovery.

Discovery and Pellete are Sold by Drugglets

Testimonials from those cured of Liver Dis-

Diseases of the Blood.

Tetter, Salt Rheum, Scald Head, St. Anthony's Fire, Rose Rash or Erysipelas, Ringworms, Pimples, Blotches, Spots, Eruptions, Pustules, Boils, Carbuncles, Sore Eyes, Rough Skin, Scurf, Scrofulous Sores and Swellings, Fever Sores, White Swellings, Tumors, Old Sores and Swellings.

"The blood is the life." This is as true as a mathe-

matical or any other scientific proposition, and one that should influence every physician. From the blood we derive our strength and mental capabilities. When this source is corrupted the painful and sorrow-pro-ducing effects are visible in many shapes. From our blood our systems are built up and kept in repair. The strength of our constitutions and our powers of en-durance, and the withstanding of disease-producing agencies with impunity, depend largely upon the con attion in which our blood is kept. If it holds in suspen-sion or solution vile festering poisons, all organic func-tions are weakened thereby. Settling upon vital and important organs, as the brain, lungs, liver, and kidkeep the blood in a perfectly healthy condition, and the Kheum or any Erysipelas humor, you not only cure those diseases, but you put your system in such an improved condition that you are not liable to any other disease. No matter what the external or exciting cause may be, the real or direct cause of a large proportion of all chronic or lingering diseases is bad blood. The multifarious forms in which it manifests itself would form subjects upon which I might write volumes. But as all the varied forms of disease which depend upon bad blood, a few of which I have coumerated at the head of this article, are elements, it is not of practical importance that I should they all require for their cure very similar treatment, it is of no practical utility to know just what name to ap-ply to a certain form of skin disease, so you know how best to cure it. Then, again, I might go on and describe various kinds of scrofulous sores, fever sores, white swellings, enlarged glands, and ulcers of varying appearance; but as all of these various appearing man festations of bad blood are cured by uniform means, I deem such a course unnecessary. Thoroughly cleanse the blood, which is the great fountain of life, and good digestion, a fair skin, buoyant spirits, vital strength, and soundness of constitution will all return to us.

The Liver is the great depurating, or blood-cleaning, organ of the system. Set this great "housekeeper" of our health at work, and the foul corruptions which gender in the blood and rot out, as it were the ma-

are pre-eminently the articles needed. They cure every pimple, blotch, or eruption. Great, eating picers kindly

Thousands of Testimonials

ROCHESTER, N. Y., Jan. 13, 1874.

ults are well calculated to callst our best efforts for its suits are well calculated to caust our best efforts for its cure. What is Consumption? It is a disease of the lungs produced by an acrid and impure condition of the blood, which, circulating through these most delicite organs, poisons and irritates their tissues and invites the scrotulous humors of the blood, causing the deposition of the briefs and establishing local scrotula. The click that it is a local inflammation, it has treated

Another prolific cause of the development of scrofu lous disease of the lungs, or tubercular consumption. Is Chronic Nasal Catarrh, which, extending along the mucous lining membrane of the throat, traches, and bronchial tubes, finsily attacks the substance of the lungs, and here establishes such an irritation as to in-vite the blood to deposit its burden of impurities in these organs. Consumption itself is not so often hereditary as is generally supposed. That a condition of low vitality may be transmitted from parents to children is unquestionably true. It is this deficiency of vitality which is inherited—a weakness which makes nutrition imperfect and leads to the deposit of tupercles. But thousands of persons who inherit feebie vi-tality would never suffer from Consumption if the functions of the system were kept correct and the blood pure. But when the stomach performs its office only partially and the food is but half digested, nothing is done to establish vitality and keep up the supply of good blood and nourish all the tissues of the system healthfully. And when the liver occomes torpid and but very imperfectly pours off the effete, poisonous ma-terials of the blood, the Lungs, as has before been shown, become irritated, the general health becomes broken down and the person feels languid, weak, faint, drowsy, and confused. Pain in the right side, in the region of the liver, and sympathetic pain in the shouders and spine and through the lungs is generally complained of. The patient has a dry, backing cough—that Liver Cough! Small, minute tubercles are neveloped in the Lungs, and perhaps exist for mouths all unknown to their victim. Nothing is done to remove the tubercles by the ordinary treatment. Cough is only a symptom of the disease : yet this only is simed at in the There is no rational way to cure Consumption except

to pur fy the blood and invigorate the digestive organs that they may manufacture healthy, rich bio id. Those polsonous materials in the blood which cause the tuber cles must be thrown off by exciting the Liver to action Vita ity must be supported, the system nourished and built up, and the development of tubercles thus pre-vented. Remove the blood poison by restoring the acvented. Remove the blood poison by restoring the action of the Liver, and the cough, which is only a symptom of real disease, is relieved. You there by strike at the root of incipient Consumption and cure the patient. I have records of hundreds of cases of confirmed consumption, pronounced such by eminent physicians, that have been cared by the use of my Golde's Medical Discovery of Williams. Discovery, or with that and my Pleasant Purgative Pel lets, sometimes also combining the use of Dr. Sagr's Catarrh Remedy, when the case was compileated with Catarrh. This statement will not seem extravag ni to the intelligent physician, who knows the num ser of my patients and the rationality of my treatment. In fact, I often treat physicians and members of their families for Catarrh, Bronchitis, and Consumption, entirely un-known to the personal friends and acquaintances of that physician. The truth being that most physicians do not profess to have any skill in curing those diseases, yet they are not willing to let the people know that I do cure them. They frequently employ my medicines in treating such cases, but don't let their patient know i frequently remarked in the dissecting room the large number of cases where persons have died of other disease, yet their lungs, upon examination, showing unmistakable evidence of having, perhaps years before, been affected by tubercular Consumption. We have in the books records of hundreds of such cases that are well authenticated, but I have only room to call the reader's attention to one such record, and I ask your thoughtful consideration of it. In the proceedings of the Connecticut Medical Society for 1806, page 145. m y be found: "Observations, Ante-Mortem and Post-Mortem, upon the case of the late President Day, by Prof. S. G. Hubbard, M. D., New Haven," from which we learn that Jeremish Day, LL. D., who was for twenty-nine years President of Yale College, was while a mere routh a victim to pulmonary Consumption. During his Infancy and boyhood his vitality was feeble. He entered Yale College as a student in 1789, "but," as Prof. Huobard remarks, "was soon obliged to leave college on account of pulmonary difficulty, which was quophices the neigh-

of pulmonary difficulty, which was doubtiess the incip ient stage of the organic disease of the Lungs which subsequently developed itself." He remained in fee-ble health for two years, but returned to college and graduated in 1797. For the next six years his Lung difficulties were quite severe, and he repeatedly bled from the Lungs in large quantities; but he had so far recovered in 1803 as to accept a Professorship, was afterward chosen President of the college, which office he held for many years in the enjoyment of good health. He died from "old age," as we are told, in 1837, aged 94 years! Why was he not killed by consumption? Beother decilitating agents that destroy digestion, to a treatment of blood-cleansing, blood-nou rishing, and tonic medicines, with good, nutritious food. Had he onsumption? Yes, both lungs were to a considerable extent involved, the lung structure being ulcerated at several points, and spit up until large cavities were formed in both lungs. But let us have the evidence upon this point. I will give it in the words of Prof. Hubbard, who, in writing of the lungs, says of the examination after death :

"On opening the thorax only a moderate quantity, perhaps a pint, of serum was found in both cavities—
THE LUNGS WERE EVERYWHERE FREE FROM TURKE-CULAR DEPOSIT, AND IN ALL RESPECTS HEALTHY. more in diameter, also a third circular cleatrix on th left side of the left lung, a few the less below the apex that the vomice (cavities), of which they were the re nains, HAD BEEN LARGE AND OF LONG DURATION

He further says: " Here, then, was all that remained to mark the begiuning, progress, and cure of a case of tubercular consumption, occupying inceite years in its period of activity, and with its incipient stage dating back more than three-quariers of a century. A legible r.cord, surpassing in interest and importance to the human race those of the slabs of Nineven or the Runic inscrip

phia was very similar in every respect to this. Cases like those of President Day and Dr. Physick are con-stan by occurring in my practice. I refer in confirmation of this statement, to the testimonial of Mr. Ww. H SPENCER, published by me, whose case was pronounced unbercular Consumption by at least two of the most afterward cured him with my Golden Medical Disco ery, Dr. Sage's Catarra Remedy, and my Pleasant With my Discovery I have arrested the backing and

harassing cough, the night sweats and heetic fever of the consumptive invalid; snatched from the jaws of death and restored to health and happiness many who the roots and plants from which this wonderful med cine is extracted the healing properties by the use of which Consumption, the scourge of the human family may in its early stages be promptly arrested and per-manently cured. I do not wish to delute, flatter, and be accomplished when the lungs are naif consumed as many do, who, being devoid of all conscience, aim to humbug the afflicted that they may sell their ofter or e than worthless compounds. But if my Golden Medical Discovery is employed in

the first or early stages of the disease, I knew, from ample observation and actual tests in hundreds of cases, that it will positively arrest the disease and reit my Consumptive Cure; but from the fact that it i a perfect specific for the sore throat and hoarseness to which ministers and other public speakers and singers are subject, and also for Bronchitis and all severe coughs, and is an invaluable remedy for diseases of the Liver and also as a Blood Purifier, I decided not to apply to it a name that might mislead and prevent its use in other diseases, for which it is so admirably adapted. I wish to mention a most wonderful autritive property which it possesses, and which so peculiarly adapts it to the wants of the Consumptive and the Scrofulous. The nutritive properties possessed by Cod Liver Oil are trifling when compared with those possessed by my Discovery. It is astonishing to see how it builds up the solid muscle and increases the flesh and weight of those whose systems are reduced below the usual standard of perfect health.

Bleeding from the Lungs, Catarrh, Bronchitis, Consumption.

A Wonderful Cure.

ROUBSTER, N. F., Jan. 15, 1872.

R. F. Pierce, Suffalo, N. Y.

DEAN IR: I had suffered from catarrh in an ageravaled form for about twelve years and for sever 1
years from broad-mid troude. Trust many doctors
and things with no lasting bruncht. In May, 1872, be-

In this reedie state, raist g olood almost daily, illuit about the lat of March, 1873, when I became so bad as to be entirely confined to the house. A friend sig ested your remedies. But I was extremely sceptical that they would do me any good, at had lost all herri in remedies, and began to look upon mediene and dee ors with disgut. However, I obtained one of your circulars, and read it carefully, from which I came to the conclusion that you understood your business at least. I finally obtained a quantity of Dr. Saors Catarri Remedy room medical their vigorous use according to the set of the conclusion that you understood mences their vigorous use according to the set of the property of the piscovery and Peliets in a short time brought out a severe cruption, which continued for some weeks. I felt much better, my appetite improved, and I gained in strength and fish. In three months every vestige of Catarrh was gone, the dronchits had nearly disappeared, had no cough whatever, and I bad entirely ceased to raise blood, and, contrary to the expectation of some of my friends, the cure has remained permanent. I have no more nemorrhages from the lungs, and smentirely free from the Catarrn, from which I had suffered so much and so long. The ebt of cratitude I owe for the besting I have received at your hands knows no bounds. I am thoroughly satisfied from my experience that your medicine will master the worst forms of that colous disease, Catarrh, as well as throat and lung diseases. I have recommended them to very many, and said ever speak in their praise. Gratefully yours, WM. H. Spencer.

In another letter Mr. Spencer says: "I have had a temarkable experience. Taose familiar with my past

WM. H. SPENCER.

P. O. DON 507, Rochester, N. Y.

In another letter Mr. SPENCER savs: "I have had a rimarkable experience. Those familiar with my past illn's shook upon my present condition of health as an almost miraculous restoration. The physican who is probably the best surgeon and old school phasician in the city, said to me last summer, that according to the usual course of thines, a man in the condition you were in a year ago out as and who should be sufficiently of Mr. Spencer's testimonial, will have their scep leism removed by addressing a short note to him. I hope no one, however, will annoy him with long letters, as, although he feels very grateful for his restoration to health, and is willing to said in spreading the gast indings of relief to other sufferers from Catarrh, Bronchitis, and Consumption, yet, if one out of a thousand who read this testimous should write him a letter asking an answer, he would find little time to do anything else than write replies. I hope, therefore, any who do write him will say but few words, and not capted to exceese a posture stamp for a reply, or you cannot expect him to answer.

Mr. Spencers to a gentleman very widely known, and among those who know him no one would pretend to question his statements nor doubt his sound judgment.

Address all letters to

Hablemville, Columbia County, N. Y., J. R. V. Picroe, M. D., Buffalo, N. Y. Dear Sir: Your favor is just received. I intended to have written to you several weeks since concerning the improvement of my health, which is now very apparent. I have used one bottle of Favorite Prescription with the best reams, although I will admit I was somewhat discouraged after its use (for a short time only). I took it under disadvantageous circumstance—having the supervision of the hou e, and during the season of "h use cleaning" I was obliged, through the incompetency of he p, to do more than I ought and, on onever raised my hand, and old all I could to bring "order out of chaos"—bur, upon laying aside all careand continuing the remety—I man myself, after using less than one bottle, to one so much benefited that I have discontinued its use, with no return of the symptoms of which I wrote you. I have suffer a terribly and what added to my distress was the consciousness of not procuring relief from ordinary sources. At times it seemed about impossible to stand, so great was the diteress. All of those severe in a sign palus have disposared. They were so ond at times I could narriy walk without some external pressure. They seem to have let me like magic, suddenly, and have no return. All other symptoms have been removed. The severe weakness and fa intess have disappeared, and I cango up stans with comparative case now. I would have informed you ere this of my improvement, for I appreciated it, but I was learnin it was only transine benefit I was re-eving. But I think suddened turn has el used to consider the benefit air results permanent. Accept of my best washes for your future success and your kindness in advising me. Yours truly, R.V. PIERCE, M.D.,

World's Dispensary,

DITTALO N Y.
